

MustGrow

BIOLOGICS CORP.

WHO IS MUSTGROW?

We are a CSE listed company with a 100% owned patented technology for application in multiple markets. We are focused on providing a suite of natural, science-based products for Cannabis cultivation.

Pre-Plant Soil Bio-Pesticide Product For:

- Gray Mold (Botrytis)
- Root Rot (Fusarium)
- Testing other soil-borne pests and diseases

Post-Plant Bio-Control Product For:

- Powdery Mildew
- Foliar based application

Bio-Fertility Product For:

- To help rejuvenate the soil and growth media for increased yield, terpenes, and THC levels.

MustGrow's IP For Cannabis

- Branded as **CannaProtector**[®]
- Registration in process
- Over 110 independent trials completed that show our technology is safe and effective at controlling pests and diseases.
- Third party trials have shown 100% control of soil-borne diseases such as Botrytis and Fusarium after 24 hours.

MustGrow Investment Opportunity

- MGRO-CSE
- Applying for listing on OTC (USA) and Frankfurt.

SOLUTIONS FOR CANNABIS GROWERS

Pre-Plant Bio-Pesticide

CannaProtector®

- **Botrytis (Gray Mold) and Fusarium (Root Rot)**
 - 100% control after 24 hours.
 - Treat the soil or growth media.
- **Other Soil-Borne Pests and Diseases**
 - Currently testing **CannaProtector®** on pests such as aphids, thrips, spider mites, gnats, etc.

Post-Plant Bio-Control

CannaVate®

- **Powdery Mildew Treatment**
 - A biological fungicide for cannabis use for the suppression of Powdery Mildew.
 - Same active ingredient (*Streptomyces Lydicus*) that was used in the cannabis industry before being pulled by a large multinational bio-ag company.
 - Registration in process with target to be on the market under a new brand in the next 15 months.

Bio-Fertility Product

TP-1000

- **Enhanced Soil Fertility**
 - Increase yield, THC, and terpenes.
 - Proven through 3rd party studies.
 - Product is sales ready.

3RD PARTY GREENHOUSE RESEARCH

↑ **+22%** Terpenes
+10.2% THC
+4.6% Floral

Important: Always read and follow label instructions.
